EVERWONDR GUESTBOOK

- *Network several sign-in locations to build contact lists across organizations*
- *Easy setup in under an hour*
- *Add custom graphics and a survey*
- *Sort and track visitors by season and geography*
- *All survey results charted and graphed automatically*

Automate your visitor center sign-in process to track guest data and target communications. Setting up the EverWondr Guestbook is easy. Simply load your brand graphics and text, then you're off and running. As visitors arrive, they skip the old school, hand-written guestbook and sign-in using a computer, kiosk, tablet or laptop. You can even add a survey if you'd like. Once entered, you can search content by state, city, zip code, keyword and date range. Results are charted and graphed for easy analysis.
