ADD ON: Guestbook

Automate your visitor center sign-in process to track guest data and target communications.
Setting up the EverWondr Guest Book is easy. Simply load your brand graphics and text, then you're off and running. As visitors arrive, they skip the old school, hand-written guest book and sign-in using a computer, tablet or laptop. You can even add a survey if you'd like. Once entered, you can search content by state, city, zip code, keyword and date range. Results are charted and graphed for easy analysis. The system even allows you network several sign-in locations together to build contact lists across organizations.

- Easy Setup in Under an Hour
- Add Custom Graphics
- Add a Survey
- Sort and Track Visitors by Season and Geography
- All Survey Results Charted and Graphed Automatically

STARTING COST $1,200 PER YEAR
